This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Special requests should be addressed to the Editor. 0022-2720/89 $03.00.

Contents of Vol. 155

Part 1

EDITORIAL 1

C. GOLGI (translated by N. LIPSKY). On the structure of nerve cells 3

C. GOLGI (translated by N. LIPSKY). On the structure of the nerve cells of the spinal ganglia 9

K. CARLSSON, P. WALLÉN and L. BRODIN. Three-dimensional imaging of neurons by confocal fluorescence microscopy 15

ANTHONY N. VAN DEN POL. Neuronal imaging with colloidal gold 27

A. DAHLSTRÖM, T. KLING-PETERSEN, S. BÖÖJ, K. LUNDMARK and P. A. LARSSON. Quantification of axonally transported material using cytofluorimetric scanning 61

ROMUALD WRÓBLEWSKI. *In situ* elemental analysis and visualization in cryofixed nervous tissues 81

L. REGEUR and B. PAKKENBERG. Optimizing sampling designs for volume measurements of components of human brain using a stereological method 113

Part 2

V. I. NIKOLAICHICK and I. I. KHODOS. A review of the determination of dislocation parameters using strong- and weak-beam electron microscopy 123

L. REIMER and M. ROSS-MESSEMER. Contrast in the electron spectroscopic imaging mode of a TEM. I. Influence of zero-loss filtering on scattering contrast 169

R. B. MARINENKO, R. L. MYKLEBUST, D. S. BRIGHT and D. E. NEWBURY. Defocus modelling correction for wavelength dispersive digital compositional mapping with the electron microprobe 183

DENNIS E. KOPPEL, CURT CARLSON and HENRY SMILOWITZ. Analysis of heterogeneous fluorescence photobleaching of video kinetics imaging: the method of cumulants 199

J. A. M. A. DORMANS. Application of the disector method in the light microscopic quantification of type II pneumocytes in control and ozone-exposed rats 207

H. M. FINLAY, P. WHITTAKER, J. G. HICKS, C. P. S. TAYLOR, Y. W. PARK and P. B. CANHAM. Spatial orientation of arterial sections determined from aligned vascular smooth muscle 213

Short Technical Note

A. A. Llorente, P. Del Castillo and J. C. Stockert. Aluminium binding to chromatin DNA as revealed by formation of fluorescent complexes with 8-hydroxyquinoline and other ligands 227

Book Review 231

Rapid Publication

John C. Russ, Hayne Palmour III and Thomas M. Hare. Direct 3-d pore location measurement in alumina RP1

Part 3

Introduction 233

G. L'E. Turner. The origins of the Royal Microscopical Society 235

W. H. Brock. Patronage and publishing: journals of microscopy 1839–1989 249

J. A. Bennett. The social history of the microscope 267

S. Bradbury. Landmarks in biological light microscopy 281

Brian Bracegirdle. The development of biological preparative techniques for light microscopy, 1839–1989 307

W. G. Hartley. Triumphs and conflicts in microscopy 319

Tom Mulvey. The electron microscope: the British contribution 327

Brian Ralph. Applications of electron microscopy in materials science and technology (microscopy in the modern world) 339

P. B. Hirsch. TEM in materials science—past, present and future 361

D. McMullan. SEM—past, present and future 373

Ewald R. Weibel. Measuring through the microscope: development and evolution of stereological methods 393

Hans J. Tanke. Does light microscopy have a future? 405

A. Howie. Future trends in microscopy 419
